Bernoulli shifts and local density property

AFFILIATIONS: Chair of High and Applied Mathematics, Russian State University of Trade and Economics, Smol'naya st., 36, Moscow, 125993, Russian Federation

ABSTRACT: We consider the property LocDen for the squaring mapping into the space of all measure preserving transformations and into the space of mixing transformations. It is proved that Bernoulli shifts with infinite entropy do not possess this property. © 2012 Allerton Press, Inc.
